EXPERIENCE

Assistant Professor

Institute of Technical Education & Research (SOADU)

📅 July, 2021 – Ongoing 📍 Bhubaneswar, India

- Department: Computer Science & Information Technology
- Teaching: Introduction to Computer Programming (JAVA), Data Structures & Algorithms, HTML, CSS, Problem Solving & Program Design with C, Python, Django Framework.

Senior Software Engineer

Capgemini

📅 August, 2015 – August, 2017 📍 Location

- Project: Analysis & Correction Tool
- Role: ABAP Developer
- Analysis & Correction Tool (ACT) is an implementation project developed to Analyze the custom code based on HANA checks and Auto-Correct code based on issues listed in the analysis report.

PROJECTS

An Experimental Study on Text GCN Model

- This study will walk through the work on text-based Graph Convolutional Network (GCN) and the various experiments on text-based GCN.

Forecasting COVID-19 Cases

- Forecasting the Confirmed, Recovered and Death Cases in the Country.
- GitHub: <https://github.com/ankithkumark/COVID19>

PUBLICATIONS

📄 Journal Articles

- K. A. Kumar, "A linux based content management system," *IJSRP*, vol. 4, 2014.

👥 Conference Proceedings

- K. A. Kumar, M. Garg, M. D. Shah, K. R. Ahmed, T. Agarwal, and V. Saraswat, "Deep learning-based forecasting of solar photovoltaic generation for microgrid control," in *2025 International Conference on Automation and Computation (AUTOCOM)*, 2025.

STRENGTHS

Problem Solving

Data Structures & Algorithms

Object Oriented Programming
